WORK EXPERIENCE

Full-stack Developer

Consulta company

2021-2022

- Developed and managed the backend of an consulta app using Node.js, Express.js, MySQL, and AWS.
- Developed and managed the backend of an consulta app using React.js, Next.js and Redux.
- Worked on three web applications targeting customers, Employees, and admin users; built 50+ RESTful APIs with functionalities such as login/sign up, view Laws and other things pertain to lawyers, A comprehensive search of everything on the site, Book a paid consultation through the website, checkout the order, etc.
- Build Socket.io (server and client)
- Make promo code in consulta partition to make admins create promo code for users
- Register/login to the web app(with OAuth-based Google Sign-In).
- Global Search for all data in the app.
- Create paid consulta from the web app
- Show posts for users, and create posts for admins
- Real time chat to make chat between user and admins
- **Tools:** Node.js, Express.js, Next.js, MySQL
- **Project Link:** <https://consulta-node.vercel.app/>

Assistant for Programmers

Freenet, German, remote

October 2022 - April 2023

- As a programmer's assistant at freenet, I played a significant role in helping create multiple endpoints for the company's website, including the control panel. Leveraging my technical expertise and attention to detail.
- Assisted the programmer in various tasks, such as code documentation, testing, and bug fixing.
